III. Description of Programs and Potential Disclosure of Information Claimed as Confidential Business Information (CBI) to Contractors

The EPA's Office of Transportation and Air Quality (OTAQ) has responsibility for protecting public health and the environment by regulating air pollution from motor vehicles, engines, and the fuels used to operate them, and by encouraging travel choices that minimize

emissions. In order to implement various Clean Air Act programs, and to permit regulated entities flexibility in meeting regulatory requirements (e.g., compliance on average), we collect compliance reports and other information from them. The information submitted may be claimed as CBI. Information submitted under such a claim is handled in accordance with EPA's regulations at 40 CFR part 2, subpart B and in accordance with Agency procedures, including comprehensive system security planning. When the EPA has determined that disclosure of information claimed as CBI to contractors is necessary, the corresponding contract must address the appropriate use and handling of the information by the contractor and the contractor must require its personnel who require access to information claimed as CBI to sign written non-disclosure agreements before they are granted access to data.

In accordance with 40 CFR §2.301(h), we have determined that the contractors, subcontractors, and grantees (collectively referred to as "contractors") listed below require access to CBI submitted to us under the Clean Air Act and in connection with various programs related to the regulation of fuels and fuel additives under both 40 CFR part 79 (subparts A through F) and 40 CFR part 80 - (subparts A through O, and appendices). OTAQ collects this data in order to monitor compliance with Clean Air Act programs and, in many cases, to permit regulated parties flexibility in meeting regulatory requirements. For example, data that may contain CBI are collected to register fuels and fuel additives prior to introduction into commerce under 40 CFR part 79. Certain programs under 40 CFR part 80 are designed to permit regulated parties an opportunity to comply on average, or to engage in transactions using various types of credits. Programs utilizing credits include gasoline sulfur, gasoline benzene, and RFS. Data submitted under 40 CFR part 80 includes information related to reformulated and conventional gasoline, diesel fuel, detergents, and renewable fuels. Fuels program data is reviewed and

assessed to determine the success of the programs or to plan for regulatory improvements. We are issuing this Federal Register notice to inform all affected submitters of information that we plan to grant access to material that may be claimed as CBI to the contractors identified below on a need-to-know basis.
